

3rd World Conference on Research Integrity

May 5-8, 2013, Montréal, Canada

Website: www.wcri2013.org

The 3rd World Conference on Research Integrity will focus international attention on research integrity, responsible conduct of research, and publication of research. Attendees will have opportunities to learn the current state of worldwide progress on research integrity, discuss new challenges and emerging topics, and help shape national and international responses.

Areas of particular interest for the upcoming conference include:

- Integrity in cross-national, cross-disciplinary and cross-sector partnerships
- Trust in science including political and media issues, responses to misconduct, and correction of the scientific record
- Emerging challenges in research integrity associated with new technologies and scientific frontiers
- Fostering research integrity through policies, codes, standards and training

Building on previous conferences in [Lisbon](#) (2007) and [Singapore](#) (2010), the Conference will provide a forum for exchange of ideas among national and institutional leaders, policy makers, research funders, leaders of professional societies, journal editors, publishers, researchers, educators, administrators, and graduate and postdoctoral trainees.

The Third World Conference invites proposals for presentations and posters on *empirical research on research integrity* and *analyses of related issues*. To submit a proposal, see the [Call for Abstracts](#) on the conference website. The deadline is October 15, 2012.

World Conference Planning Committee Co-chairs: Melissa Anderson, University of Minnesota, U.S. (mand@umn.edu) and Sabine Kleinert, *The Lancet*, UK (Sabine.Kleinert@lancet.com)

Planning Committee Members: Peter Brooks, King Abdullah University of Science and Technology, Saudi Arabia; Dirk de Hen, National Board of Scientific Integrity, Netherlands; Daniele Fanelli, University of Edinburgh, Scotland; Mark Frankel, AAAS, U.S.; Abraham Fuks, McGill University, Canada; Pascale Ouellet, Université de Montréal, Canada; Carthage Smith, ICSU, France; Ping Sun, Office of Research Integrity, Ministry of Science and Technology, China; Jan Taplik, Nanyang Technological University, Singapore; David Wright, Office of Research Integrity, U.S.; Ren Yi, Macquarrie University, Australia
